NH DHHS COVID-19 Update – May 18, 2021

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Tuesday, May 18, 2021, DHHS announced 139 new positive test results for COVID-19. Today’s results include 63 people who tested positive by PCR test and 76 who tested positive by antigen test. There are now 1,118 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are twenty-eight individuals under the age of 18 and the rest are adults with 44% being female and 56% being male. The new cases reside in Rockingham (33), Merrimack (18), Grafton (16), Hillsborough County other than Manchester and Nashua (15), Cheshire (11), Strafford (8), Belknap (5), Carroll (2), Sullivan (2), and Coos (1) counties, and in the cities of Manchester (11) and Nashua (11). The county of residence is being determined for six new cases.

Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have had close contact with a person with a confirmed COVID-19 diagnosis.

DHHS has also announced one additional death related to COVID-19. We offer our sympathies to the family and friends.

- 1 male resident of Hillsborough County, 60 years of age and older

There are currently 48 individuals hospitalized with COVID-19. In New Hampshire since the start of the pandemic, there have been a total of 97,904 cases of COVID-19 diagnosed.

1 Hispanic/Latino includes people of any race.
2 All other races are non-Hispanic/Latino or Hispanic/Latino ethnicity unknown.
3 Other includes non-Hispanic: American Indian/Alaska Native, Native Hawaiian/Other Pacific Islander, or two or more races.
5 Data represent persons vaccinated at NH vaccination sites, excluding federally allocated vaccine doses (n=71,532), through May 16th, 2021 and entered into the New Hampshire Immunization Information System.
6 Data are temporarily unavailable due to a technical issue.

1 Doses available for site to order are the number of first and second doses that have been made available to the site to order.  
2 Doses distributed are the number of first and second doses that the site has ordered and received at their location. Orders are based on clinic schedules and average uptake of vaccine by participants.  
3 Doses administered may exceed the number of doses distributed due to the ability to get extra doses out of a vial, depending on the type of syringe used.  
4 Includes the single-dose Janssen Biotech vaccine.  
5 Includes the 2-dose Pfizer BioNTech and Moderna vaccines.  
* The LTCF PPP is a federal program that sends pharmacies into LTCF to vaccinate residents and staff. In order for LTCF to access this program in New Hampshire, NH DHHS was required by the CDC to allocate a fixed number of doses to guarantee that pharmacies would have enough vaccine to complete vaccination administration within a four-week time frame. This program remains on schedule as originally anticipated and will be continually monitored to ensure completeness.  
**Retail Pharmacy: Includes doses allocated to the State of NH that were distributed to a Pharmacy in addition to doses allocated directly from the federal government to the federal retail pharmacy partnership program.

</table>
1. Vaccine is distributed equitably across the state to vaccination sites based on a pro-rata share of vaccines available each week and population size of the region being served.
2. Doses distributed are the number of doses that the site has ordered and received at their location. Orders are based on clinic schedules and average uptake of vaccine by participants.
3. Doses administered may exceed the number of doses distributed due to the ability to get extra doses out of a vial, depending on the type of syringe used.
4. Includes the single-dose Janssen Biotech vaccine.
5. Includes the 2-dose Pfizer BioNTech and Moderna vaccines.
Note: Data presented represent doses distributed and administered through May 16th, 2021.
