MONOCLONAL ANTIBODY INFUSION LOCATIONS
for persons who have contracted COVID-19 and are at-risk of severe outcomes

**STEP 1:**
If you test positive for COVID-19, contact your Primary Care Provider to determine if you are at high risk of severe outcomes and eligible for monoclonal antibody treatment. If you do not have a primary care provider, you may contact ConvenientMD or other health providers. If you require emergency care, you may be seen in person at an emergency room.

**Step 2:**
If your healthcare provider determines you are eligible for the treatment, they will contact a Monoclonal Antibody Infusion Site to request an infusion appointment.

**Step 3:**
The Monoclonal Antibody Infusion Site will contact you. If it is determined you meet clinical criteria, the site will provide specific instructions on your appointment.

Sotrovimab is the Monoclonal Antibody administered. It has shown to be effective against the Omicron variant of COVID-19.
